

Background

Chengdu plant successfully adopted GSQA for packing material several years ago. RM inspection is one of top remaining touches in Chengdu plant, besides with CM expansion to contribute 75% of GC business, it is meaningful to apply GSQA CM to expand the benefit with touch/effort reduction in material receiving and simplify the work at supplier as 100% PM and 60% RM are shared suppliers with in-house.

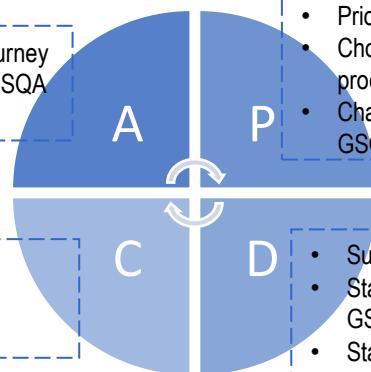

全力以赴 全域突破**What was done?**

Project Name:
GC DL Touchless Quality enabled by GSQA

Project Leader: Xu Hongqing
Dept.: QA

How it works?

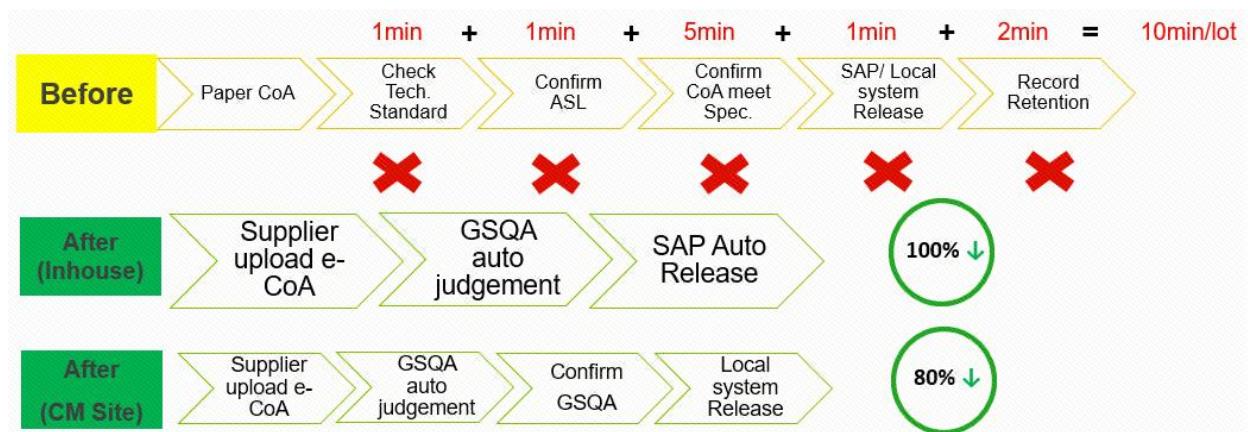

- Develop the GSQA roll out journey map to achieve 100% RPM GSQA

- Priority setting for each supplier based on business volume impact
- Choose one supplier and one CM site as leading/pilot to set up the new process
- Chart the team, proactively engage MSM, supplier get alignment with GSQA target, CPS etc.

- Monthly review eCoA release status
- Trouble shooting Q&A

- Supplier Capability building
- Standardize and simplify the process of supplier upload e-CoA into GSQA
- Standardize the CM plant release process is the key driver to fast roll out from the pilot to all CM site

Before vs. After
